Hi Andrew,

Thank you for forwarding the reports. Hexion is reviewing and will be formulating a detailed response to submit to EPA. At a high level, it appears that EPA ignored the algal ecotoxicity test result and relied on the predicted value from ECOSAR. We also have questions on how the lower rate of the PMN substance to acetaldehyde was accounted for in the calculation of the POD, particularly in light of the metabolism study results. Also, can you please send a copy of the exposure report for us to review. It wasn't included in the other documents.

We will send our more detailed response shortly.

Thanks,

Regina Green
